

Filter Grid view en Model Search

In Search Model for filter

add public property

```
public $locatie;
```

add to safe in rules

```
public function rules() {  
    return [  
        ....  
        [['locatie'], 'safe'],  
    ];  
}
```

add in join

```
// locatie is attribute from student  
$query = Gesprek::find()  
    ->joinwith(['student'])
```

note that student is relation

```
public function getStudent()  
{  
    return $this->hasOne(Student::className(), ['id' => 'studentid']);  
}
```

add in andFilterWhere

```
$query->andFilterWhere(['like', 'student.locatie', $this->locatie]);
```

In Search Model for sort

add sort attributes

```
$dataProvider->sort->attributes['locatie'] = [  
    'asc' => ['student.locatie' => SORT_ASC],  
    'desc' => ['student.locatie' => SORT_DESC],  
];
```

In view

add column

```
[  
    'attribute' => 'locatie',  
    'contentOptions' => ['style' => 'width: 20px;'],  
    'format' => 'raw',  
    'value' => 'student.locatie',  
],
```
